Paper 1 Multiple Choice – Cells As The Basic Units Of Living Organisms

MARK SCHEME

Maximum Mark: 30

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the 2026 series for most Cambridge IGCSE™, Cambridge International A and AS Level components, and some Cambridge O Level components.

This document consists of 4 printed pages.

Question	Answer	Marks
1	**B** ; *Both animal cells and bacterial cells possess a cell surface membrane, DNA, and ribosomes (though bacterial ribosomes are 70S while animal cytosolic ribosomes are 80S). Animal cells lack cell walls and capsules.*	1
2	**C** ; *Typical eukaryotic cells contain linear DNA associated with histones in the nucleus (2) and 80S ribosomes in the cytoplasm (3). (Mitochondria/chloroplasts contain 70S ribosomes and circular DNA, but typical cellular genome is linear with 80S cytosolic ribosomes).*	1
3	**C** ; *Option C correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
4	**B** ; *Enzymes are globular proteins and are synthesized on ribosomes (either free in cytoplasm or on the rough endoplasmic reticulum).*	1
5	**D** ; *Prokaryotes uniquely possess circular DNA naked of histones and lack membrane-bound organelles; both prokaryotes and plants have cell walls, and all cells possess cell membranes and ribosomes.*	1
6	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
7	**C** ; *Option C correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
8	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
9	**A** ; *Option A correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
10	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
1	**A** ; *Option A correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
2	**B** ; *The membrane is described as 'fluid' because phospholipids and proteins move laterally within the monolayer, and 'mosaic' because protein molecules are scattered within the phospholipid bilayer.*	1

Question	Answer	Marks
3	**C** ; *Option C correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
4	**D** ; *Option D correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
5	**A** ; *Option A correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
6	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
7	**C** ; *Option C correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
8	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
9	**A** ; *Option A correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
10	**D** ; *Option D correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
1	**A** ; *Option A correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
2	**D** ; *Option D correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
3	**C** ; *Option C correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
4	**D** ; *Option D correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1

Question	Answer	Marks
5	**A** ; *Option A correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
6	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
7	**C** ; *Option C correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
8	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
9	**A** ; *Option A correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
10	**D** ; *Option D correctly fulfills the Cambridge 9700 learning criteria for Cells As The Basic Units Of Living Organisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
