Paper 1 Multiple Choice – Chromosome Behaviour In Mitosis

**MARK SCHEME**

Maximum Mark: 30

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the 2026 series for most Cambridge IGCSE™, Cambridge International A and AS Level components, and some Cambridge O Level components.

This document consists of 4 printed pages.

| Question | Answer | Marks |
|---|---|---|
| 1 | **A** ;<br>*Option A correctly fulfills the Cambridge 9700 learning criteria for Chromosome Behaviour In Mitosis. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.* | 1 |
| 2 | **B** ;<br>*Option B correctly fulfills the Cambridge 9700 learning criteria for Chromosome Behaviour In Mitosis. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.* | 1 |
| 3 | **C** ;<br>*Option C correctly fulfills the Cambridge 9700 learning criteria for Chromosome Behaviour In Mitosis. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.* | 1 |
| 4 | **D** ;<br>*Option D correctly fulfills the Cambridge 9700 learning criteria for Chromosome Behaviour In Mitosis. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.* | 1 |
| 5 | **A** ;<br>*Option A correctly fulfills the Cambridge 9700 learning criteria for Chromosome Behaviour In Mitosis. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.* | 1 |
| 6 | **C** ;<br>*During anaphase, the centromeres divide and sister chromatids are pulled by spindle microtubules to opposite poles of the cell, becoming individual chromosomes.* | 1 |
| 7 | **C** ;<br>*Option C correctly fulfills the Cambridge 9700 learning criteria for Chromosome Behaviour In Mitosis. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.* | 1 |
| 8 | **D** ;<br>*Option D correctly fulfills the Cambridge 9700 learning criteria for Chromosome Behaviour In Mitosis. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.* | 1 |
| 9 | **A** ;<br>*Option A correctly fulfills the Cambridge 9700 learning criteria for Chromosome Behaviour In Mitosis. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.* | 1 |
| 10 | **D** ;<br>*Option D correctly fulfills the Cambridge 9700 learning criteria for Chromosome Behaviour In Mitosis. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.* | 1 |
| 1 | **A** ;<br>*Option A correctly fulfills the Cambridge 9700 learning criteria for Chromosome Behaviour In Mitosis. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.* | 1 |
| 2 | **C** ;<br>*During anaphase, the centromeres divide and sister chromatids are pulled by spindle microtubules to opposite poles of the cell, becoming individual chromosomes.* | 1 |
