Paper 1 Multiple Choice – Transport Mechanisms

MARK SCHEME

Maximum Mark: 30

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the 2026 series for most Cambridge IGCSE™, Cambridge International A and AS Level components, and some Cambridge O Level components.

Question	Answer	Marks
1	**A** ; *Water molecules form hydrogen bonds with each other (cohesion) and with cellulose/lignin in xylem walls (adhesion), creating a continuous transpiration pull under tension.*	1
2	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
3	**C** ; *Option C correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
4	**D** ; *Option D correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
5	**A** ; *Option A correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
6	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
7	**A** ; *Option A correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
8	**C** ; *Pure water has the maximum water potential of 0 kPa at standard temperature and pressure; addition of solutes lowers water potential to a negative value.*	1
9	**A** ; *Option A correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
10	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
1	**A** ; *Option A correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
2	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1

Question	Answer	Marks
3	**C** ; *Option C correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
4	**C** ; *Pure water has the maximum water potential of 0 kPa at standard temperature and pressure; addition of solutes lowers water potential to a negative value.*	1
5	**A** ; *Option A correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
6	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
7	**C** ; *Option C correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
8	**D** ; *Option D correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
9	**A** ; *Option A correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
10	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
1	**C** ; *Pure water has the maximum water potential of 0 kPa at standard temperature and pressure; addition of solutes lowers water potential to a negative value.*	1
2	**B** ; *Option B correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
3	**C** ; *Option C correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
4	**D** ; *Option D correctly fulfills the Cambridge 9700 learning criteria for Transport Mechanisms. In accordance with syllabus standards, the distractors represent common misconceptions or inverted relationships.*	1
5	**A** ; *Water molecules form hydrogen bonds with each other (cohesion) and with cellulose/lignin in xylem walls (adhesion), creating a continuous transpiration pull under tension.*	1
